Whitmore, hat of Gardiner, in said Ounted the Consach, party of the Property of the Property

their own medicine." There seems to be an exception to this in the case of the Measrs. Kendail of Bowdoisham, manufacturers of the Sagadahoe fertilizers, who have growthis year eighty acres of oats fertilized with their commercial fertilizers alone. The crop has been harvested with a McCornsick twine binder harvester, and is estimated to reach twenty-five hundred or more bushels. This shows enterprise; and we want a great deal more of it all over the State. There is something in this bush ness of farming if we only go at it and work it out. It never comes from holding back. If one would reap a harvest an effort must be put out to produce it. "Go in" is a sidewalk along, but we want a great deal more of it in our farming.

Mr. Robert Hall, an Ohio butter inspectioe, says that where butter is properly churned, both as to time and temperature, it becomes firm with very little working, and fit is tensclous; but its most desirable state is waxy; when it is moulded into any shape, and may be drawn out a considerable length without breaking. It is then styled gille-edge. It is only in this that butter possesses that rich nutty taste and smell, and shows up a rich golden yellow color which imparts so high a degree of pleasure in eating it, and which increases lie value many fold. It is not always necessary, when it smells sweet, to taste butter in judging it. The smooth unctuous feel in rubbing a little between the finger and thumb expreases at once its rich quality; the nutty smell and rich aroma indicateing cream-colored surface shows its height of cleanliness. It may be necessary at times to use it until you become an expert in testing by taste, smell and rubbing.

The frequent destruction of farm build.

Maine Farmer.

Ensurance.

The frequent destruction of farm buildings by lightning, during the aumner mounts, brings forcibly to the attention of the owners of sundance especially, there has grown up a feeling of distruct towards all insurance companies, from the fact of supposed swindles by some of the now defunct companies, from the fact of supposed swindles by some of the now defunct companies, from the fact of supposed swindles by some of the now defunct companies formerly in operation in the State, and from unaccountable and unexplained unbarrasaments which others are now in and it has shad a tendency to cause them to withdraw from all companies. As a result, there are many farmers all through the State (specially those of small means and those whose buildings are not of a very expensive character, who are not carrying any insurance on their buildings or their contents. It is not our purpose at this time to discuss the questions of alleged crockedness in mutual companies, or high tates and high salaries in stock companies, but rather to greatly of the stock of the companies of the contents. It is not business like, and should not be done. Especially does this apply to people of limited means, and on whom even the produced of the contents. It is not business like, and should not be done.
